Professional
Standards
Committee

Dear PSC Steering Committee Members and Observers,

In line with INTOSAI's efforts to make our organisation more strategic and agile (crosscutting priority 4 of INTOSAI Strategic Plan 2017-2022) we are proposing some changes to the format of our annual meeting. Our goal is to make it as participative as possible, having attendees reflect and weigh in on the most important issues involving our standard setting activities.

For that, we will be trying to minimise sessions that are exclusively informative and focused on reporting activities. These reports and supporting information will be posted on the PSC website ahead of time and will be discussed briefly during the meeting only to address any questions or concerns participants might have.

Our meeting sessions will be structured around themes and each one will have a specific objective and expected outputs. We are not scheduling standalone presentations, but rather we will invite specific participants, according to each theme, to contribute with their perspective, reflecting on questions we will also share beforehand. The PSC Secretariat will communicate with the different actors detailing the points we would like to have in their contributions. In addition to these contributions, all participants are welcome to join in the discussion.

Please take a close look at the proposed draft agenda which explains the objective and expected outcome of each session. The PSC Secretariat is ready to answer any question you might have regarding the agenda and the format of the event. We also ask that you support us in our attempt at making our meeting more dynamic and strategic by reading the material on the website prior to the meeting, reflecting on the proposed questions and preparing targeted contributions. We are committed to posting all the updated documents on the PSC website by May 14th.

We appreciate your cooperation and hope that these changes will help the PSC Steering Committee be even more effective in fulfilling its role of supervising and guiding the standard setting work in INTOSAI.

Looking forward to seeing you in Luxembourg,

PSC Secretariat
April 2018
