

## **Evaluation of PSC's contribution to INCOSAI 2007 – suggestions for INCOSAI 2010**

The XIX INCOSAI in Mexico last year was an impressive task of organization and turned out as a great success. The preparations for the next INCOSAI in 2010 in South Africa is now well in progress. The Steering Committee meeting in Beijing is therefore a good occasion to reflect upon the contribution PSC made to INCOSAI. If there are any comments, suggestions or ideas for the next INCOSAI this will be the right time and place to voice them.

The PSC Chair will especially like to obtain the regional representatives' and the subcommittee chairs' views on the following:

### **1. PSCs presentations at the PSC meeting, Governing Board meeting and the INCOSAI plenary session.**

In accordance with the INTOSAI Handbook and the PSC Terms of Reference PSC presented its report and proposals at 3 different meetings in connection with INCOSAI 2007: The PSC meeting for all members of PSC, the Governing Board meeting and in the first plenary session for all INCOSAI delegates. The suggested ISSAI's and INTOSAI GOVs and other motions of PSC were approved in the second plenary session.

#### ***How can PSC's presentations best be organized in 2010?***

*Should all 3 presentations be maintained? Should there be differences between them?*

*How should the balance be between information on the content of the proposed ISSAIs and INTOSAI GOVs and the reporting on the meetings and other activities carried out by the subcommittees?*

### **2. The meeting materials delivered by PSC.**

Before INCOSAI 2007 the ISSAIs and INTOSAI GOVs proposed for endorsement were posted at [www.issai.org](http://www.issai.org) in the 5 INTOSAI languages. In accordance with the INTOSAI Hand Book the PSC subcommittees were also asked to provide an adequate number of paper copies in the official INTOSAI format. This amounted to a total of over 8000 documents to be delivered by PSC's subcommittees and made available for endorsement at INCOSAI. In spite of great efforts made this proved difficult to achieve fully in practice. Before INCOSAI 2010 all new ISSAIs and INTOSAI GOVs will be available at [www.issai.org](http://www.issai.org) as exposure drafts and endorsement versions well in advance of the congress. A template will be made available to be used for documents to be posted at [www.issai.org](http://www.issai.org).

#### ***How are proposed ISSAIs and INTOSAI GOVs best made available at the next INCOSAI in 2010?***

*Should PSC strive to comply more fully with the requirements of the INTOSAI Handbook? Or is it preferable instead to rely on printouts from [www.issai.org](http://www.issai.org) or perhaps an electronic solution?*

### **3. PSC's official report, communication material etc.**

PSC's report was produced in the months before the congress and consisted of inputs from all subcommittees using a common template. In addition the PSC Secretariat produced information materials and organized a common PSC information stand to promote [www.issai.org](http://www.issai.org) and the new names ISSAI and INTOSAI GOV. At the next INCOSAI the ISSAI framework will be well known and less promotion needed.

#### ***How should PSC appear at the next INCOSAI in 2010?***

*Any ideas and suggestions are welcome.....*
