# PSC Steering Committee

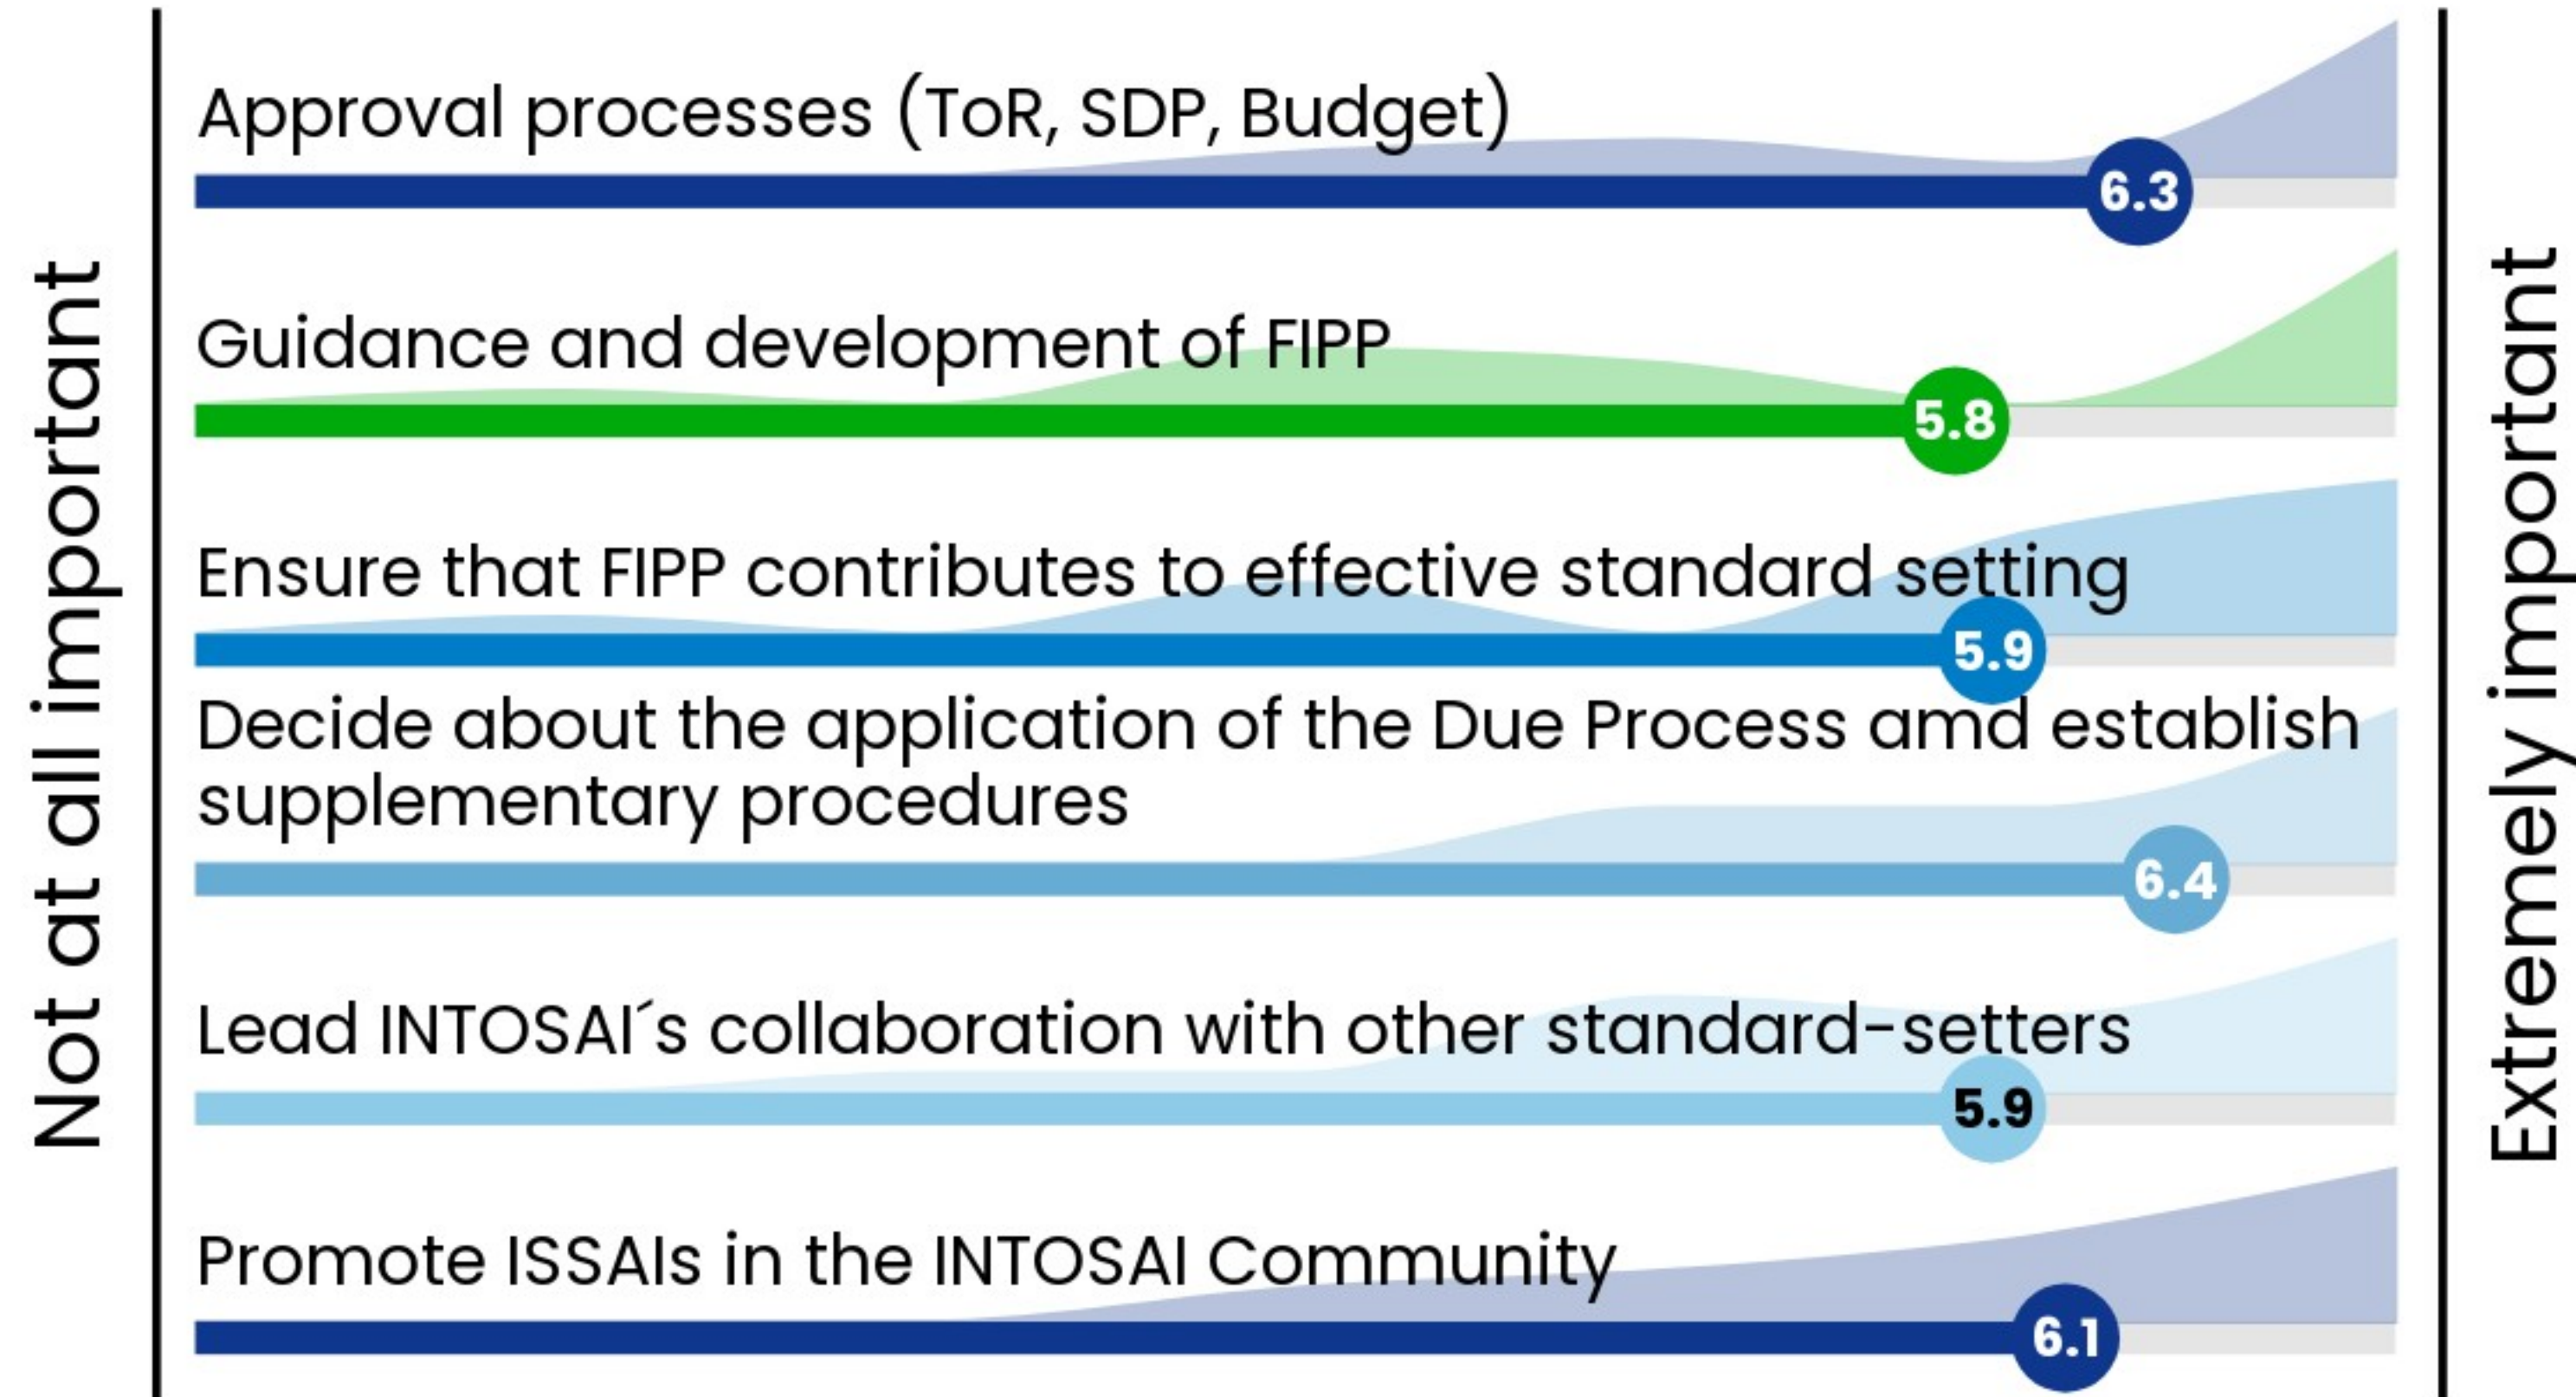

Member Survey 2021

## **Currently, the main competencies of the PSC SC include**

- Approving the changes in FIPP's terms of reference before they are presented to the Governing Board
- Approval of changes in the PSC's terms of reference before they are presented to the Governing Board
- Strategic development plan (SDP) for INTOSAI's framework of pronouncements: Decision on the organization of the planning process and approval
- Approval of the budget for INTOSAI standard-setting activities
- Encouraging relevant candidates for FIPP to come forward through the nomination process organized by the goal chairs
- Give guidance, and drive long-term development of FIPP
- Ensuring that FIPP contributes to reliable and effective standard setting
- Provide a linkage of FIPP to INTOSAI's regions, the PSC's subcommittees, the CBC and the KSC as well as other INTOSAI bodies
- Decide about any issues in relation to the application and the procedures of the due process
- Establish supplementary procedures needed to make the due process work well in practice
- Lead INTOSAI's collaboration with other international standard-setters
- Raise awareness on FIPP and promoting the ISSAIs in the INTOSAI community and among external stakeholders

# How would you rate the following PSC SC competencies

# What competencies would you add to the SC? Which ones would you remove?

...

Monitoring of ISSAI implementation, including user-value (fit-for-purpose) and continued relevance. Facilitate better communication between subject-matter experts and the FIPP. Provision of subject matter expertise to the FIPP.

Les compétences sont assez suffisantes et pertinentes

It seems that it will be enough to properly and effectively realise the current competencies.

Add: Provide clear linkage and specific assigned roles for the different players within the standard setting structure, such as FIPP, TSF, PSC, WG, GC and the regions.

To lead standard setting for, as inferred by goal 1 responsibilities, meaning leading the SDP and approving project plans and final drafts based on FIPP opinion, before submission to the GB.

We find all the present competencies essential, especially till the FIPP model matures and current discrepancies are clarified.

Add: Ensure that an effective feedback loop is available for all matter related to INTOSAI professional pronouncements

See previous answer.

# What competencies would you add to the SC? Which ones would you remove?

Promote and / or encourage the creation of additional easy to understand reading materials regarding the content of the professional standards developed in order to increase the citizens interest and knowledge of them.

I wouldn't remove any; as they are all fairly important. I would just ensures a consistent coordination with all INTOSAI bodies to avoid any miscommunications.

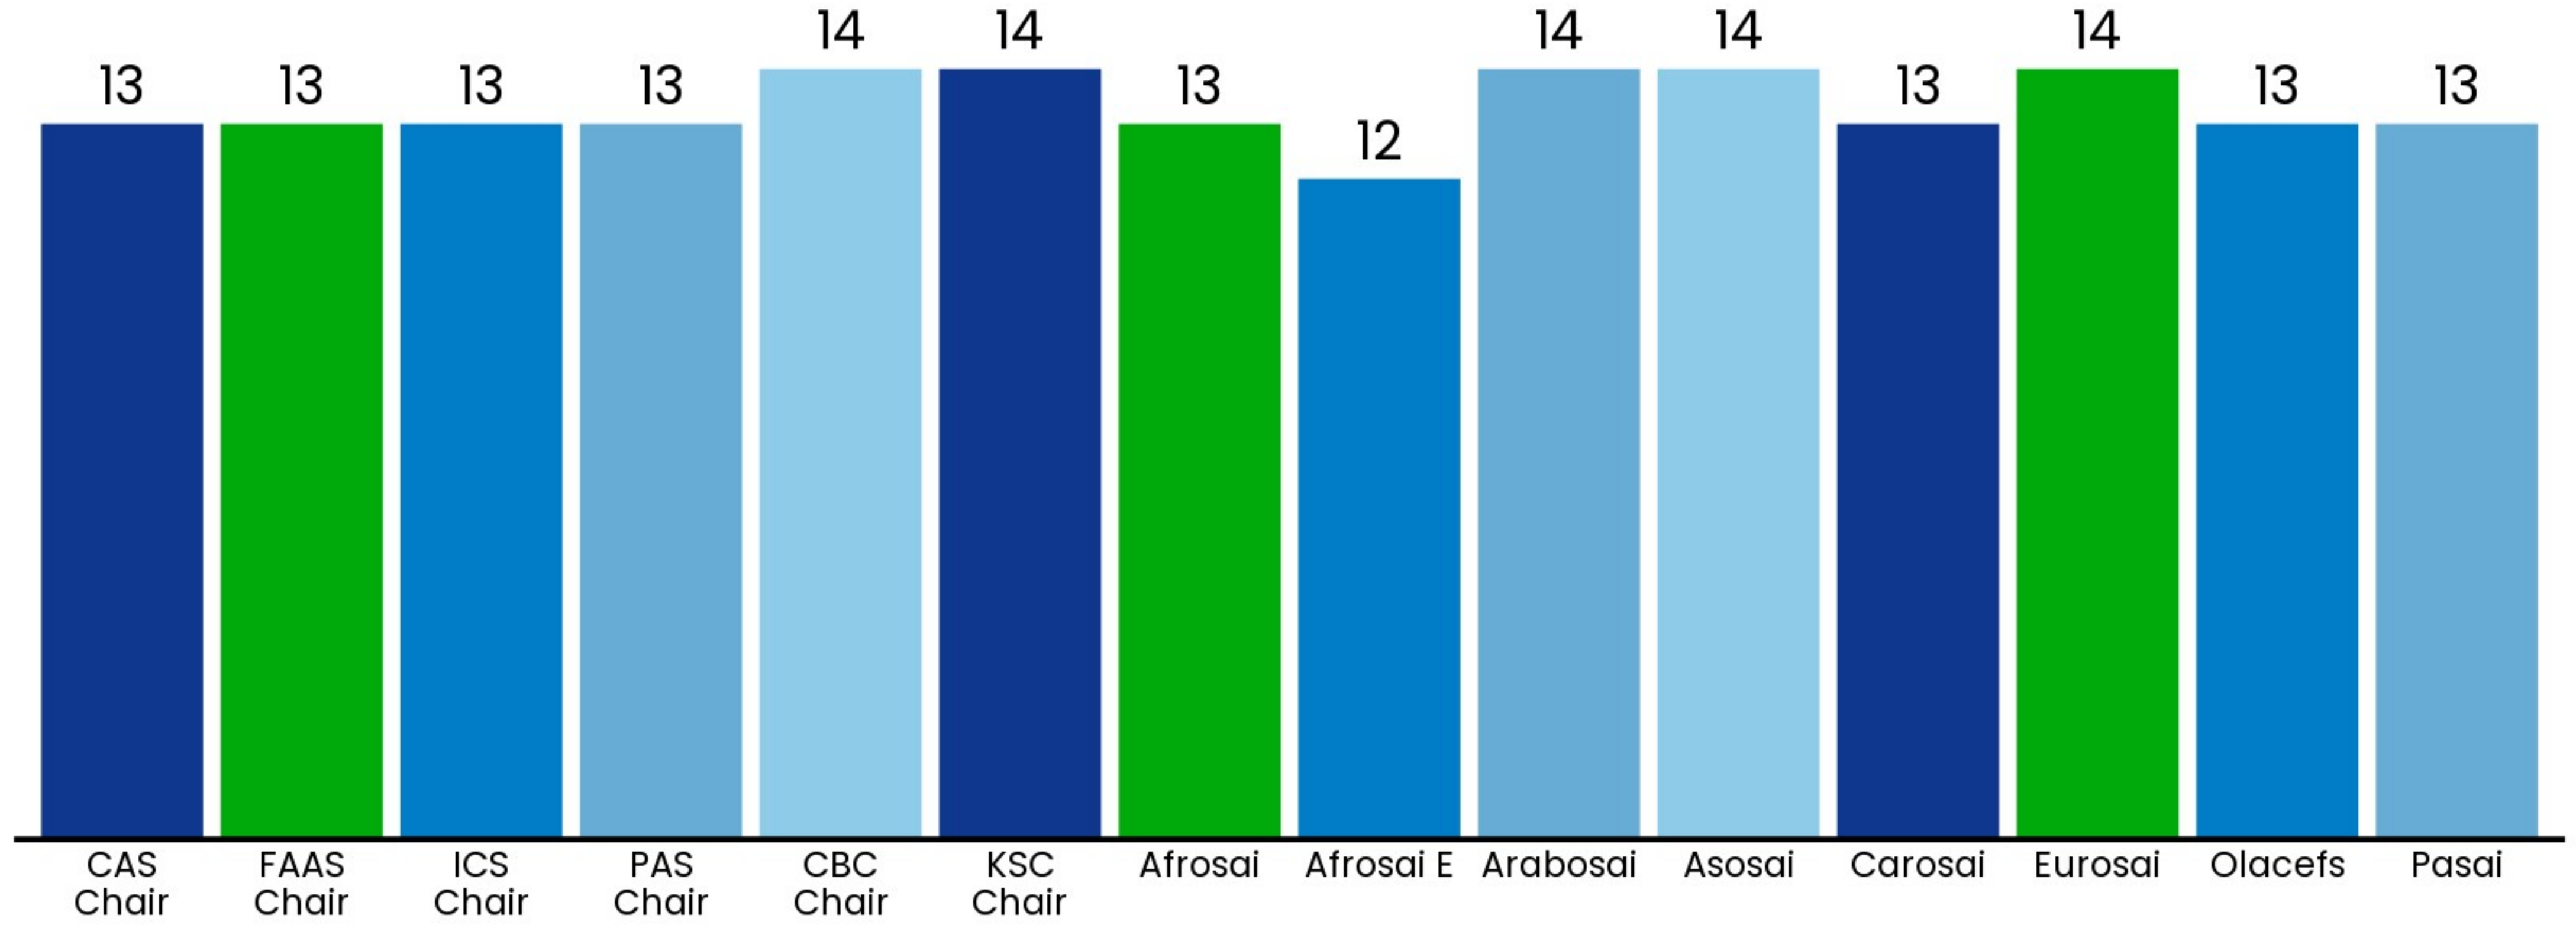

The PSC SC should have a role to address and help clear differences of opinion that may arise during the development of IFPP pronouncements.

Strengthen the mode of promoting ISSAIs in the INTOSAI community by exploring options for greater interaction of SAls with standard setting bodies and within the community, and providing a platform for such an interaction

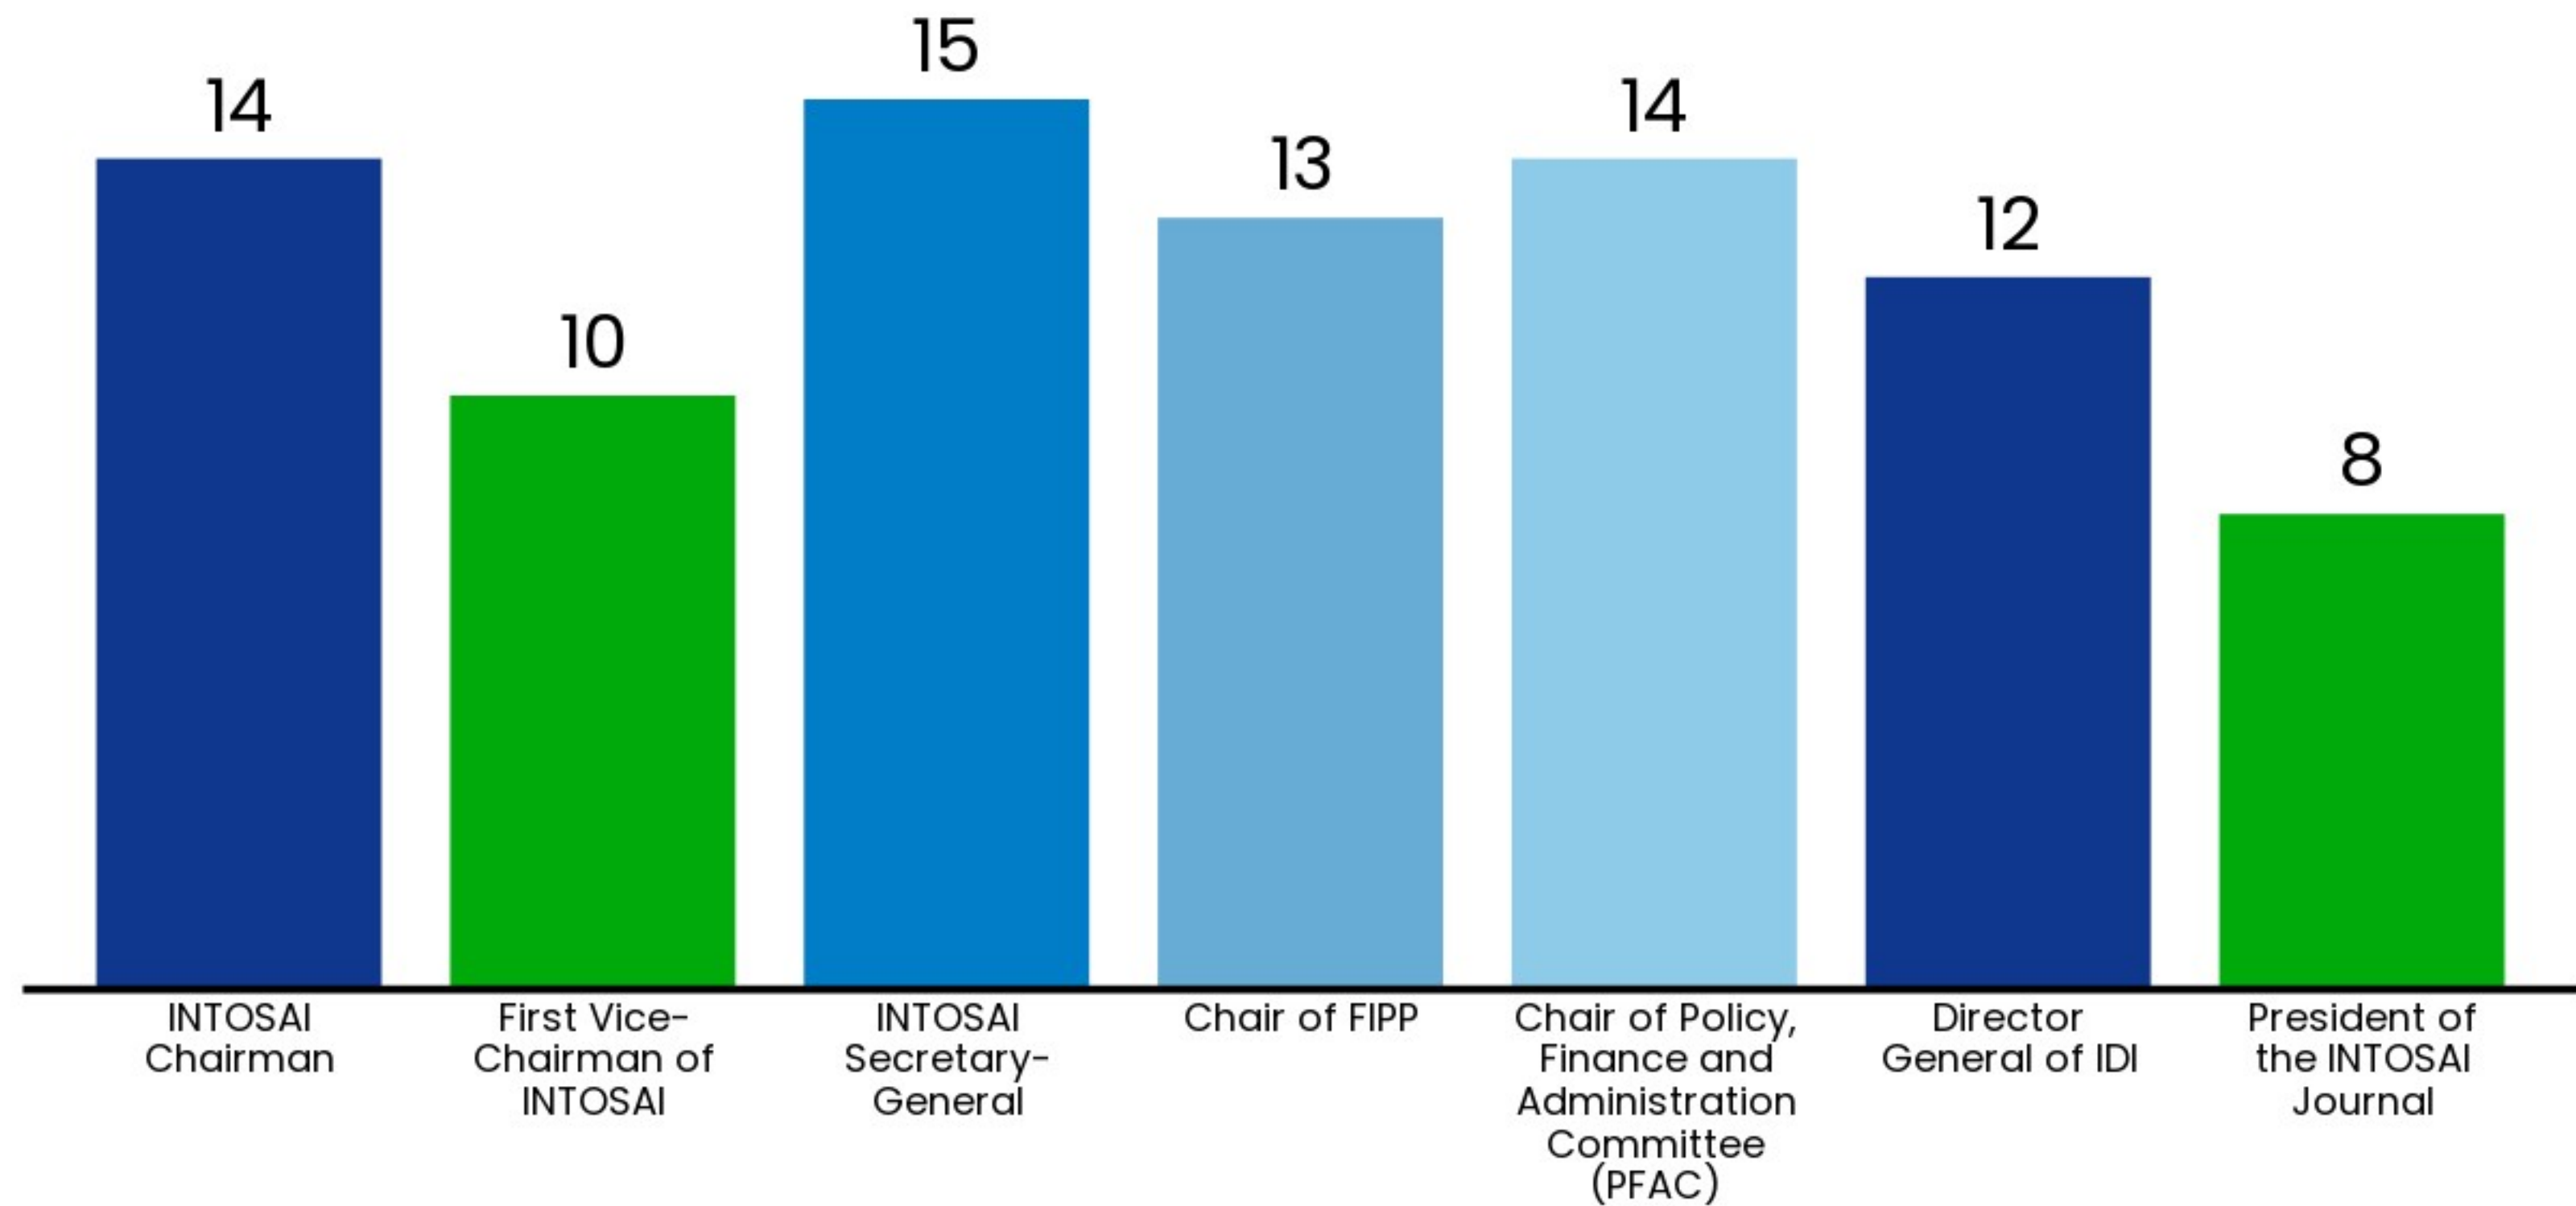

None of the existing competencies should be removed, they are all very important.

To coordinate, prevent and reconcile professional disputes between working groups.

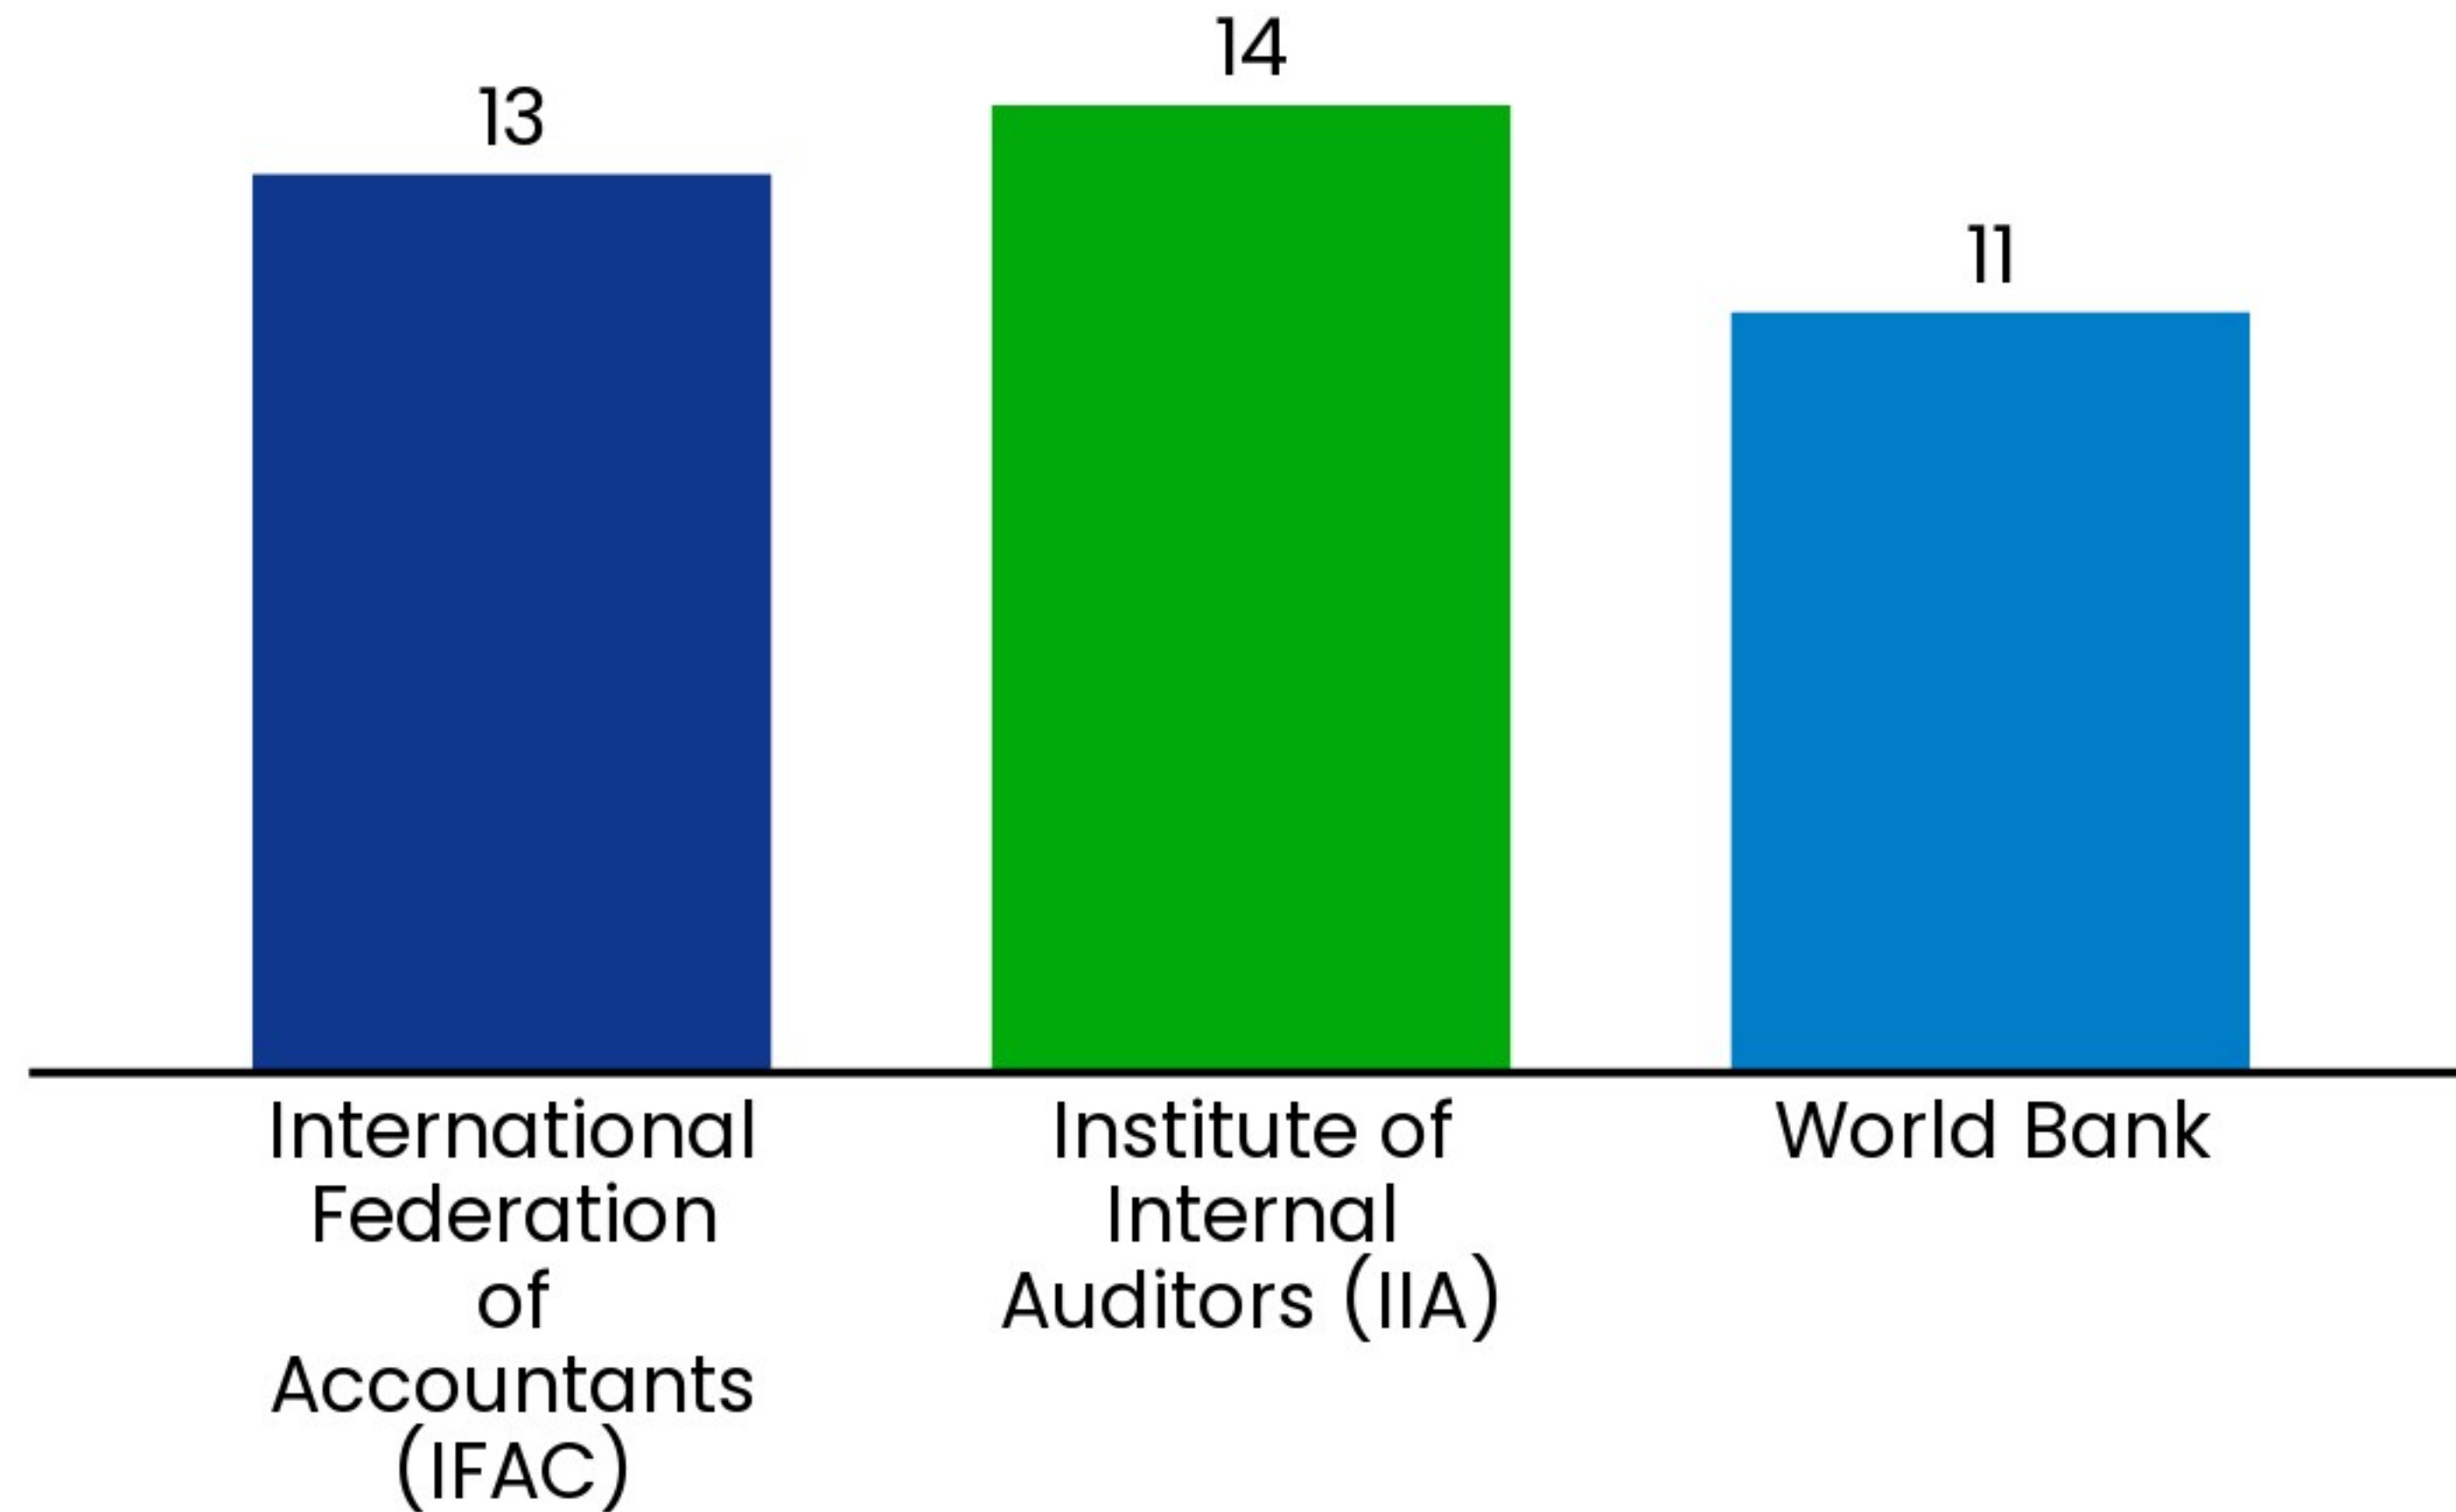

# Which of the following should continue as members of the PSC SC

# Which of the following should continue as observers of the PSC SC

# Which of the following should continue as advisory partners of the PSC SC

# Who else should be at the PSC SC?

CIPFA

CIPFA

Other international bodies as advisory partners, such as OECD for example and other relevant bodies.

FIPP Vice chair as observer

all the bodies mentioned previously should be at the PSC SC

The committee is already exhaustive. We may consider inviting the project leads of SDP projects on adhoc basis to present their view points on the projects.

None.
